

Product Specification Sheet

Slide Warming Unit

Product code: IDWC100

Pack Size: 1

Product Summary

- Warming equipment for safe fixing, drying, and staining of slides
- Includes heating blocks, convection ovens, and bench-style heaters
- Varies in temperature range and slide holding capacity
- Ensures precise temperature control for optimal sample processing
- Ideal for histology, pathology, cytology, and other lab applications
- Facilitates efficient slide preparation for microscopic analysis
- Maintains sample integrity throughout the process
- Easy-to-use design for all laboratory professionals
- Compact and space-saving for workstation or bench integration
